PROFESSIONAL EXPERIENCE

Senior Full-Stack Engineer, OneReach.ai | Feb 2025 — Jan 2026

Warsaw, Poland (remote)

- Led development of Master Contractors module, enabling management of subcontractors, improving platform scalability and supporting business growth.
- Built and improved team management dashboards (roles, permissions, internal users), allowing clients to manage operations without external support.
- Integrated payment providers (including OatFi) and financial flows, implementing reliable payout logic and improving transaction stability.
- Developed Transactions and Accounts modules (state transitions, balances, ledger logic), ensuring consistency and traceability of financial operations.

Full-Stack Engineer, NDA - e-commerce | Dec 2023 — Feb 2025

Warsaw, Poland (remote)

- Developed Customizer (canvas-based photo editor) as a separate npm package and isolated module with its own development environment.
- Built and maintained core backend services using NestJS and PostgreSQL (products, orders, ERP sync), including async jobs, retry logic, and data mapping for reliable system integration.
- Designed end-to-end media pipeline (photo editor → upload → Amazon S3 → backend processing), improving asset handling performance and reducing load times via compression and caching strategies.

Senior Full-Stack Developer, Andersen Lab | Jul 2023 — Dec 2023

Warsaw, Poland (hybrid)

- Integrated Mapbox for real-time navigation and trip booking, implementing frontend map interactions and backend data integration, improving booking flow and increasing revenue.
- Redesigned platform UI using Emotion, enhancing user experience with modern animations and consistent styling across the application.
- Improved application performance across frontend and API interactions, reducing page load time by 30% and increasing Lighthouse scores, leading to higher user retention and engagement.

PROFESSIONAL EXPERIENCE (continued)

Middle / Senior Full-Stack Developer, Andersen Lab | Dec 2020 — Jul 2023

Odesa, Ukraine (on-site)

- Implemented social media sharing & preview features, increasing user engagement and share rates across major platforms.
- Developed subtitle generation pipeline (processing + formatting + delivery), integrating backend services and frontend rendering to enhance accessibility of video content.
- Built and maintained internal UI component library as a separate p m package based on Material UI, standardizing design system and improving development efficiency across the project.

Intern / Junior Full-Stack Developer, Andersen Lab | Jan 2020 — Dec 2020

Odesa, Ukraine (on-site)

- Implemented Deposit Management module (creation/edit flows, validation, interest rules), reducing input errors and ensuring compliance with business rules.
- Built reusable form components for deposit lifecycle with robust validation, reducing frontend bugs and improving reliability.
- Redesigned admin panel UI/UX for 200+ employees, improving usability and increasing task completion speed.
