PROFESSIONAL EXPERIENCE

Fullstack Developer, GigSafe | February 2025 - July 2025
Austin, Texas

- Built and launched the Master Contractors module, enabling master contractors to manage subcontractors, paving the way for increased customer acquisition and platform scalability.
- Integrated Oatfi as a new payment provider on the frontend, allowing clients to pay contractors via wire transfers and loan-based payouts.
- Developed and improved UI functionality on the Team page, enabling clients to manage their internal managers and administrators directly within the app without external support.

Fullstack Developer, NDA - e-commerce | December 2023 - February 2025
Chicago, Illinois

- Developed a custom text and video Customizer (editor), increasing seasonal sales and enabling new product launches.
- Implemented a new product type and functionality for product sets, boosting sales by allowing grouped purchases.
- Designed and implemented a Track Order function and page, enabling users to monitor their orders, resulting in positive reviews on TrustPilot.
- Resolved critical bugs and optimized site performance, improving INP from 650ms to 300ms, enhancing SEO rankings.
- Enhanced user interaction on the B2B platform and within the admin panel, improving overall user satisfaction.
- Developed additional sections in the Help Center, improving user experience and providing better access to support resources.

Senior Front-end Developer, Andersen Lab | July 2023 - December 2023
Warsaw, Poland

- Developed an international, fully responsive website for the company, including SEO optimization to improve search rankings.
- Implemented map functionality using Mapbox, enabling users to locate and book parking spots, directly contributing to revenue growth.

PROFESSIONAL EXPERIENCE (continued)

Middle Front-end Developer, Andersen Lab | December 2021 - July 2023

Odesa, Ukraine

- Developed an auto-subtitle feature for the web player, allowing users to generate subtitles automatically.
- Implemented a social-sharing feature with video previews, enabling users to share videos on social platforms, resulting in a 30% user increase within a month.
- Created an internal p m package with reusable components using Storybook, improving scalability and UI consistency.

Junior / Middle Front-end Developer, Andersen Lab | January 2020 - January 2021

Odesa, Ukraine

- Refactored WordPress components to React for improved performance and maintainability.
- Achieved over 80% test coverage using React Testing Library, ensuring application stability.
- Contributed to the implementation of a robust payment system, enhancing transaction reliability.

EDUCATION

Specialist, Marine School named after Marinesko

Odesa, Ukraine | September 2013- July 2016
